### Certificate Details

Diploma in Information Technology Management - Revised 2017

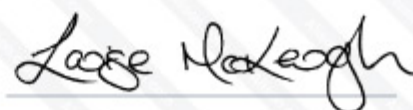

[Score: 82]

### Course Details

The effective implementation and control of modern information technology (IT) is a key aspect of running any successful business and organisation. The Diploma in Information Technology Management explains the fundamental role IT plays in both the structure and control of the modern business, and why a successful manager must have an excellent grasp of the functionality, capabilities and effects of the technology that he or she must implement and manage.

This course introduces you to core concepts of Information Technology management, and reviews key areas such as corporate frameworks, software, databases, information systems, communications and management of personnel in relation to technology and from the point of view of the business manager.

This course will be of great interest to management professionals who wish to gain an in depth understanding of the management of Information Technology in the modern corporation. The course is also ideal for those who would like to learn about the central role of Information Technology in today's workplace.
